BMJ 出版簡介

BMJ-British Medical Journal 《英國醫學雜誌》是由英國醫學會（British Medical Association）、英國 BMJ 出版集團出版的一種綜合醫學、臨床醫學學會刊物。該刊創刊於1840年，1857年改為現名，每年出版51期，每週五出刊，主要刊載醫學科學原始研究論文、綜述、教育性論文以及對人類健康有影響的臨床、科學、社會、政治與經濟因素等方面的評論性文章，也刊登相關書評、新聞等類型文章並介紹醫學新發展、討論醫學道德問題，每週也用較大的篇幅刊登編輯者述評（Editorials）、新聞（News）和讀者來信（Letters）等類型的文獻。

BMJ 每年收到的投稿文章將近6,000篇，但採用率只有9%。BMJ 現發行量達到108,500份，其中有13,500份在國外發行。BMJ 的紙本出版有四個版本：General Practice、Clinical research、International、Compact。其中 International edition 達到將近 173,000 個讀者。每週出版的期刊內容將會同時呈現在這四個版本中，和在 Student BMJ 與線上 BMJ。BMJ 2004年影響指數（IF值）為7.038。

BMJ Journals Online

BMJ 結合各領域的專業團體提供約25種專業期刊電子版。
BMJ Journal Online 收錄清單如下：
1. ADC Fetal and Neonatal
2. Annals of Rheumatic Diseases
3. Archives of Disease in Childhood
5. British Journal of Sports Medicine
6. BMJ – British Medical Journal
7. Emergency Medicine Journal
8. Evidence Based Medicine
9. Evidence Based Mental Health
10. Evidence Based Nursing
11. Gut
12. Heart
13. Injury Prevention
14. Journal of Clinical Pathology
15. Journal of Epidemiology & Community Health
16. Journal of Medical Ethics
17. Journal of Medical Genetics
18. Journal of Neurology, Neurosurgery and Psychiatry
19. Medical Humanities
本使用手册以 British Medical Journal 和 Gut 期刊为范例说明。其馀 23 本期刊的使用方式与 Gut 期刊相同，请参见 Gut 期刊的使用方式。
首頁功能選項介紹

Articles 文章

Online First

BMJ的線上預覽，允許使用者當文章出版後，並經由出版社編輯後，在紙本BMJ
印刷前即可在線上預覽文章。每一篇文章將會顯示書目資料、摘要、PDF 格式
全文。HTML 版本全文可以在每一期出版時可以在每期的 Table of Content 中瀏
覧。

Current Issue
使用者可以點選 Current Issue 瀏覽當期期刊目次。

Past Issues
使用者可以在 Past Issues 瀏覽 British Medical Journal 的過期期刊。

Archive of all online issues: 1 Jan 1994 - 9 Jul 2005

Full text: 1 Jan 1994 - 9 Jul 2005

To obtain articles published before January 1994 select the link.
Topic Collections

使用者可以點選特殊主題，取得所有從 1998 年 1 月出版的所有相關文章。點選展開主題，點選隱藏主題。

Series

在 Series 這項功能下，使用者可以瀏覽從 1994 年以來 BMJ 出版社所出版的叢書。這項功能仍在進行中，如果使用者有看到任何叢書或在叢書中文章有缺的情況都可以跟出版社聯絡。在此項目下主要分成：

- ABCs
- Other series（Statistics notes, Drug points...等叢書）
- Reviews（書籍、影片、網站...等評論）
- Fillers

Theme issues

BMJ 每年會出版幾個論題性期刊，使用者可以在 Theme issues 中瀏覽即將出版或已經出版的 Theme issues。Theme issues 原始論文出版後都經過一般的同儕評論過程。這些 Theme issue 都經由內部和外部的編輯評選為適當的 Theme issue。如果您想投稿到 Theme issues，請在您的說明書中提及。

Interaction 互動

1. Rapid responses
   Rapid responses 提供使用者可以瀏覽 British Medical Journal 的使用者對於 British Medical Journal 文章的意見留言。

2. Q & A
   所有在 British Medical Journal 中的 Q & A 都是來自讀者和非 BMJ Publishing
Group Limited or British Medical Association's opinion. In Q & A provided questions and answers are only for guidance and it cannot replace professional medical advice. BMJ Publishing Group Limited and British Medical Association are not responsible for:
(A) any information published in this section
(B) users' belief in any information published in Q & A

3. Past polls and debates
Users can browse past polls and debates.

4. Webchats + Blogs
Users can browse related Webchats and Blogs.

Services 服务

Search
Provide users with the British Medical Journal's advanced search function.

Email alerts
Provide users with Journal issues, Online First articles, particular article, search terms, UK Health News Stories, etc. Email Alert.

UK health news
Provide daily summaries of health news stories appearing in UK national newspapers, prepared for bmj.com by Presswatch Media, an international media monitoring service.

Gene screening helps put an end to haemophilia
University students told to get MMR jobs

Gene screening helps put an end to haemophilia
Source: Daily Telegraph
Date: 11/07/2005
Following last week's London bombings the nationals continue with light coverage of other stories. The Daily Telegraph reports that the Clinical Sciences Centre at Hammersmith and Queen Charlotte's Hospital has developed a way of screening embryos for haemophilia, and successfully targeted the mutation in a test case on an IVF mother, Debbie Hunter, who now has a three month old baby free from the condition. The new technique will also be able to screen out genes that raise the risk of cancer.

Medscape conferences
bmj.com is Medscape's association, which provides users with selected international conference materials. Select reading topics: Cardiology, Gastroenterology, Endocrinology, Respiratory medicine...
PDA version
每個星期您可以從 bmj.com 下載最新一期的期刊目次和摘要，包含 editor choice 的全文。This week in the BMJ、editorials、news、Clinical review、letters、personal views、Soundings and Minerva。使用者如果要下載至 PDA，您必須要有 HighWire 的 Account，如果沒有您先註冊一個帳號以便進行下載動作。

Submit a manuscript
提供線上投稿和與編輯聯絡的方式。

Talks
BMJ 會不定期提供吸引大眾的演講內容，並且放在網站上提供給使用者下載。讓使用者隨時獲取演講新知。

RSS
RSS 的英文全稱是 Really Simple Syndication，是一種透過 XML(eXtensible Markup Language)特性所制定的格式，讓網站的管理者可以把網頁內容傳給訂閱戶。這是個有點像電子報和新聞群組(Newsgroup)的東西，但是賦予讀者更大的自訂能力和更豐富的資料。RSS 只是一個格式，使用者想要訂閱各網站所提供的內容還需要一個閱讀器(Reader)。

Other resources 其他連結資源
使用者可以在 Other resources 中找到相關的連結網站如：Medline/PubMed、PubMed Central、HighWire Press、BMJ Journals、BMJ Updates、bmjlearning、BestTreatments、Clinical Evidence、British National Formulary、Student BMJ 等網站。
檢索方式

Oral mucolytic drugs for exacerbations of chronic obstructive pulmonary disease: systematic review

Philippa J Poole, senior lecturer, Peter N Black, associate professor.

Department of Medicine, University of Auckland, Private Bag 92019, Auckland, New Zealand

Correspondence to: P J Poole p.poole@medsch.u Auckland.ac.nz

Abstract

Objectives: To assess the effects of oral mucolytics in adults with stable chronic bronchitis and chronic obstructive pulmonary disease.

Design: Systematic review of randomized controlled trials that compared at least two months of oral mucolytic drugs with placebo.

Studies: Twenty three randomized controlled trials in patients in Europe and United States.

Main outcome measures: Exacerbations, days of illness, lung function, adverse events.

Results: Compared with placebo, the number of exacerbations was significantly reduced in subjects taking oral mucolytics (weighted mean difference -0.07 per month, 95% confidence interval -0.08 to -0.05, P=0.0001). Based on the annualized rate of exacerbation in the control subjects of 2.7 a year, this is a 25% reduction. The number needed to treat for one subject to have no exacerbations in the study period would be 6. Days of illness also fell (weighted mean difference -0.56, 95% confidence interval -0.77 to -0.35, P=0.0001). The number of subjects who had no exacerbations in the study period was greater in the mucolytic group (odds ratio 2.22, 95% confidence interval 1.93 to 2.54, P=0.0001). There was no difference in lung function or in adverse events reported between treatments.

Conclusions: In chronic bronchitis and chronic obstructive pulmonary disease, treatment with mucolytics is associated with a reduction in acute exacerbations and days of illness. As these drugs have to be taken long term, they could be most useful in patients who have repeated, prolonged, or severe exacerbations of chronic obstructive pulmonary disease.

(Accepted 20 February 2001)

Woodhams An unusual cause of soft tissue infection
Thirunaran et al. (1 July 2005) [Full text] [PDF]

An Unusual Case of Soft Tissue Infection
4 July 2005

Dear Editor,

The case presented in the editor’s quiz raises several issues regarding compartment syndromes and the timing of interventions, and the documentation of necrotizing infections and their surgical treatment.

Gas within the muscle compartments on plain radiography not only suggests a gas forming myonecrotic infection, particularly in a diabetic patient, but also a high probability of a compartment syndrome developing. The elevated creatine phosphokinase confirms significant muscle injury but is unnecessary as the clinical presentation and radiological findings are sufficient to require immediate exclusion of a compartment syndrome by surgical exploration. Loss of pulses is a late sign of raised intra-compartmental pressure and delay in fasciotomy increases the degree of ischemia, rate of limb loss and extent of reperfusion injury after the pressure within the compartment is released. This may have contributed to this patient ‘not surviving the procedure’. If at fasciotomy there is myonecrosis the choice of procedure lies between either aggressive debridement or, in this case with a probable systemic gas forming...
